## **CONCENTRA ACQUIRES ASSETS OF BUSINESS HEALTH SERVICES, INC.**

ADDISON, Texas, August 22, 2007 – Concentra Health Services, Inc. ("Concentra" or the "Company") recently announced that it has acquired Business Health Services, Inc. ("BHS"), which includes five fully dedicated occupational health care centers in the Detroit and Ann Arbor markets. The acquisition of these centers expands Concentra's geographic footprint to 23 centers in Michigan.

In addition to the five health care centers, BHS also operated three on-site medical facilities providing episodic care, wellness programs, and health fairs for local employers. Milt DuPuy, M.D., and Joe Hymes, BHS executive director, have joined the company as the Detroit Medical Director and Michigan Director of Operations, respectively.

Keith Newton, President of Concentra, said, "We are very pleased about the opportunity to expand our presence and service capabilities to local employers in Michigan. BHS has been committed to providing comprehensive medical treatment for injured employees—a philosophy that parallels that of Concentra and ultimately results in tremendous benefits for our patients and clients."

Concentra also provides work-related injury and non-injury health care services, including pre-employment physicals, flu shots, and drug testing. The company employs board-certified physicians, licensed therapists, occupational health specialists, and trained medical technicians to deliver exceptional health care to people throughout America.

### **About Concentra®**

Headquartered in Addison, Texas, Concentra, is a leading health care company that strives to make health care accessible and affordable by offering a broad range of services that provide quality patient care for work-related injuries, while containing the rising costs of occupational health care and workers' compensation. The company operates 320 occupational medical centers in 40 states and also provides urgent care services to fill the gap between primary care physicians and the emergency room. All rights reserved.
