

Behavioral Health Telemedicine

Sometimes, a work injury goes deeper than the physical wound. The psychological trauma of a work injury can damage an employee’s mental health and hinder recovery. During a workers’ compensation case, Concentra® can provide behavioral health support to injured employees in a safe, virtual space.

Use Concentra Telemed for injuries seen and unseen

Employees being treated for a work injury can log into Concentra Telemed® and talk to a licensed psychologist about anything possibly affecting their recovery.

Key features

Psychologists with PSYPACT affiliation

Regulatory knowledge

Seamless care coordination and referrals

Services include:

Delayed recovery qualification, assessment, and care

Neurocognitive screenings

Mental health diagnosis and treatment

Benefits

Better care access

Improved return-to-work outcomes

Shorter injury case durations

Concentra provides holistic care during a work injury case

Concentra Telemed pairs perfectly with virtual behavioral health services. To help accelerate an employee’s recovery, our psychologists can develop a behavioral health support program that complements the treating clinician’s return-to-work plan.
